

RIO +20 Project

Agenda Item Overview

“The main objective of this project is to build awareness among the participants of the Rio+20 Conference on the important role that SAIs play in contributing to develop a more sustainable environment through auditing and reporting on our governments’ performance and accountability and to enable our legislatures to hold them to account.” Project leaders, the SAIs of Brazil and Canada are introducing the project plan (max 30 minutes); other SC members are welcome to share their ideas.
